

KOBI YONASI QA09 - JUNE 2025

# STR REPORT

## Ashdodnet.com

Yuri Kirsanov & Lia Prokopiev

# What We Did Here?

Web Testing for a Local News Website

09

GUI

07

Functionality

01

Usability

03

Accessibility

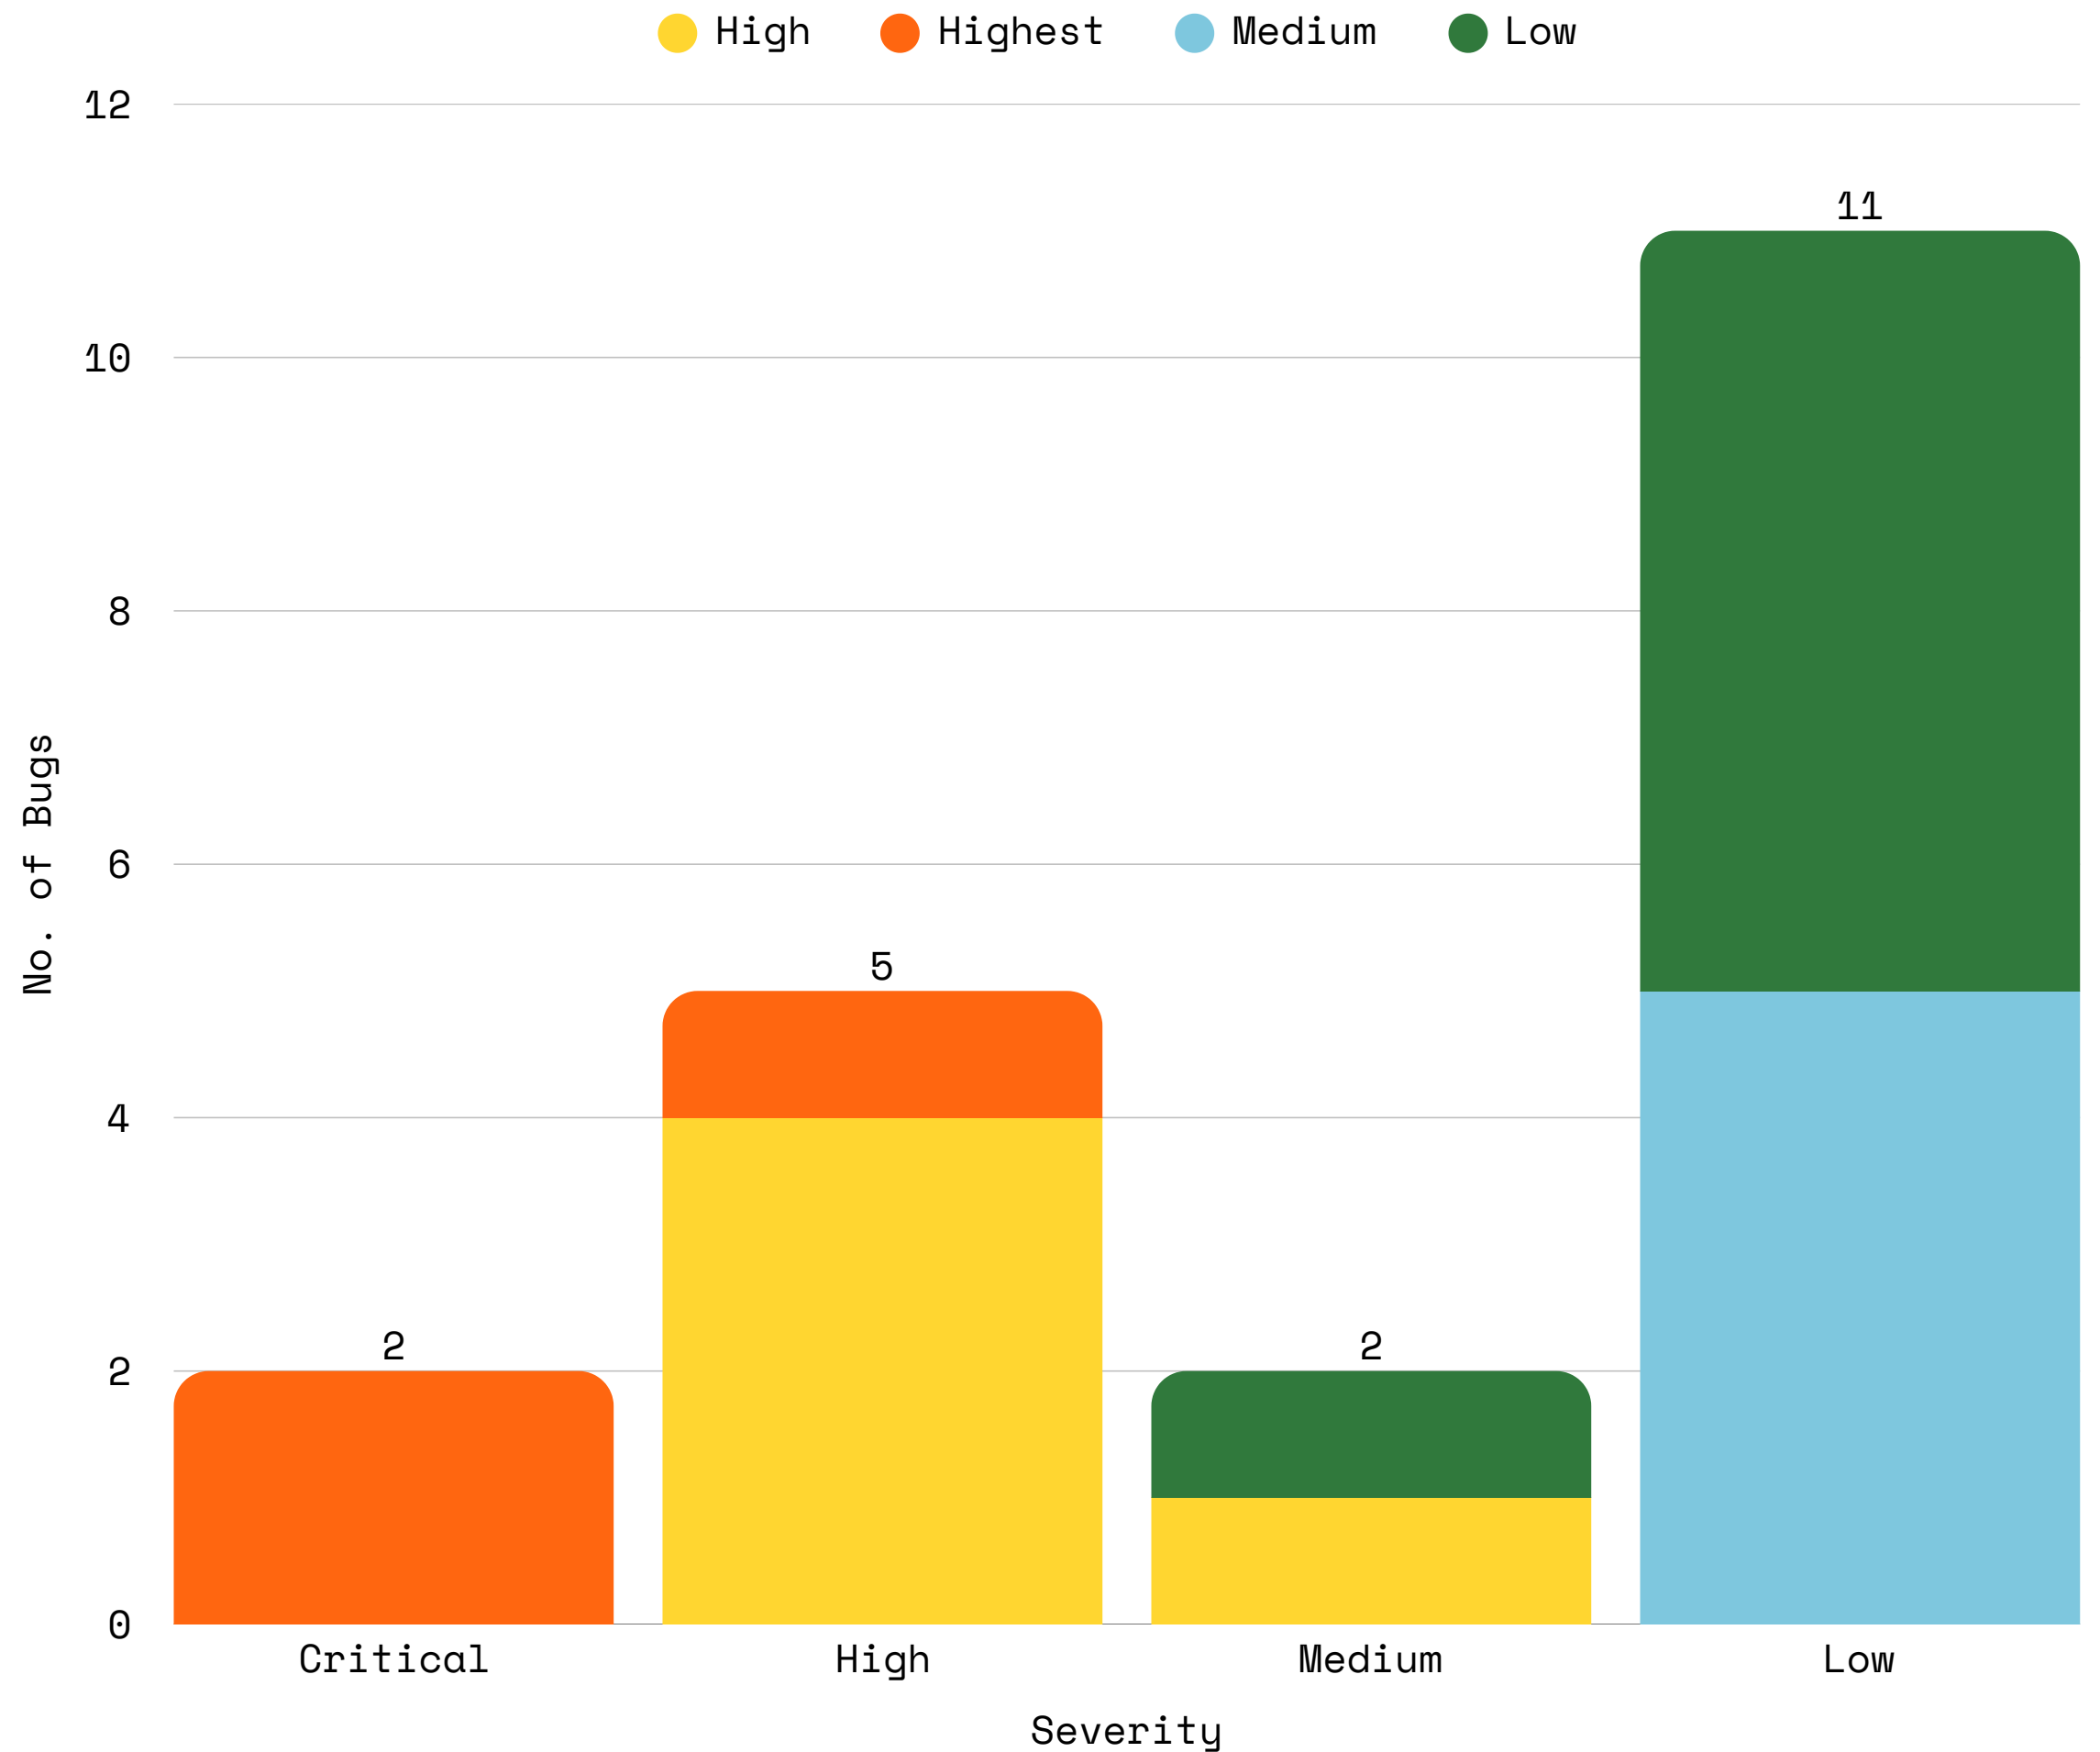

# BUGS IN CHARTS

Let's have a look at the numbers

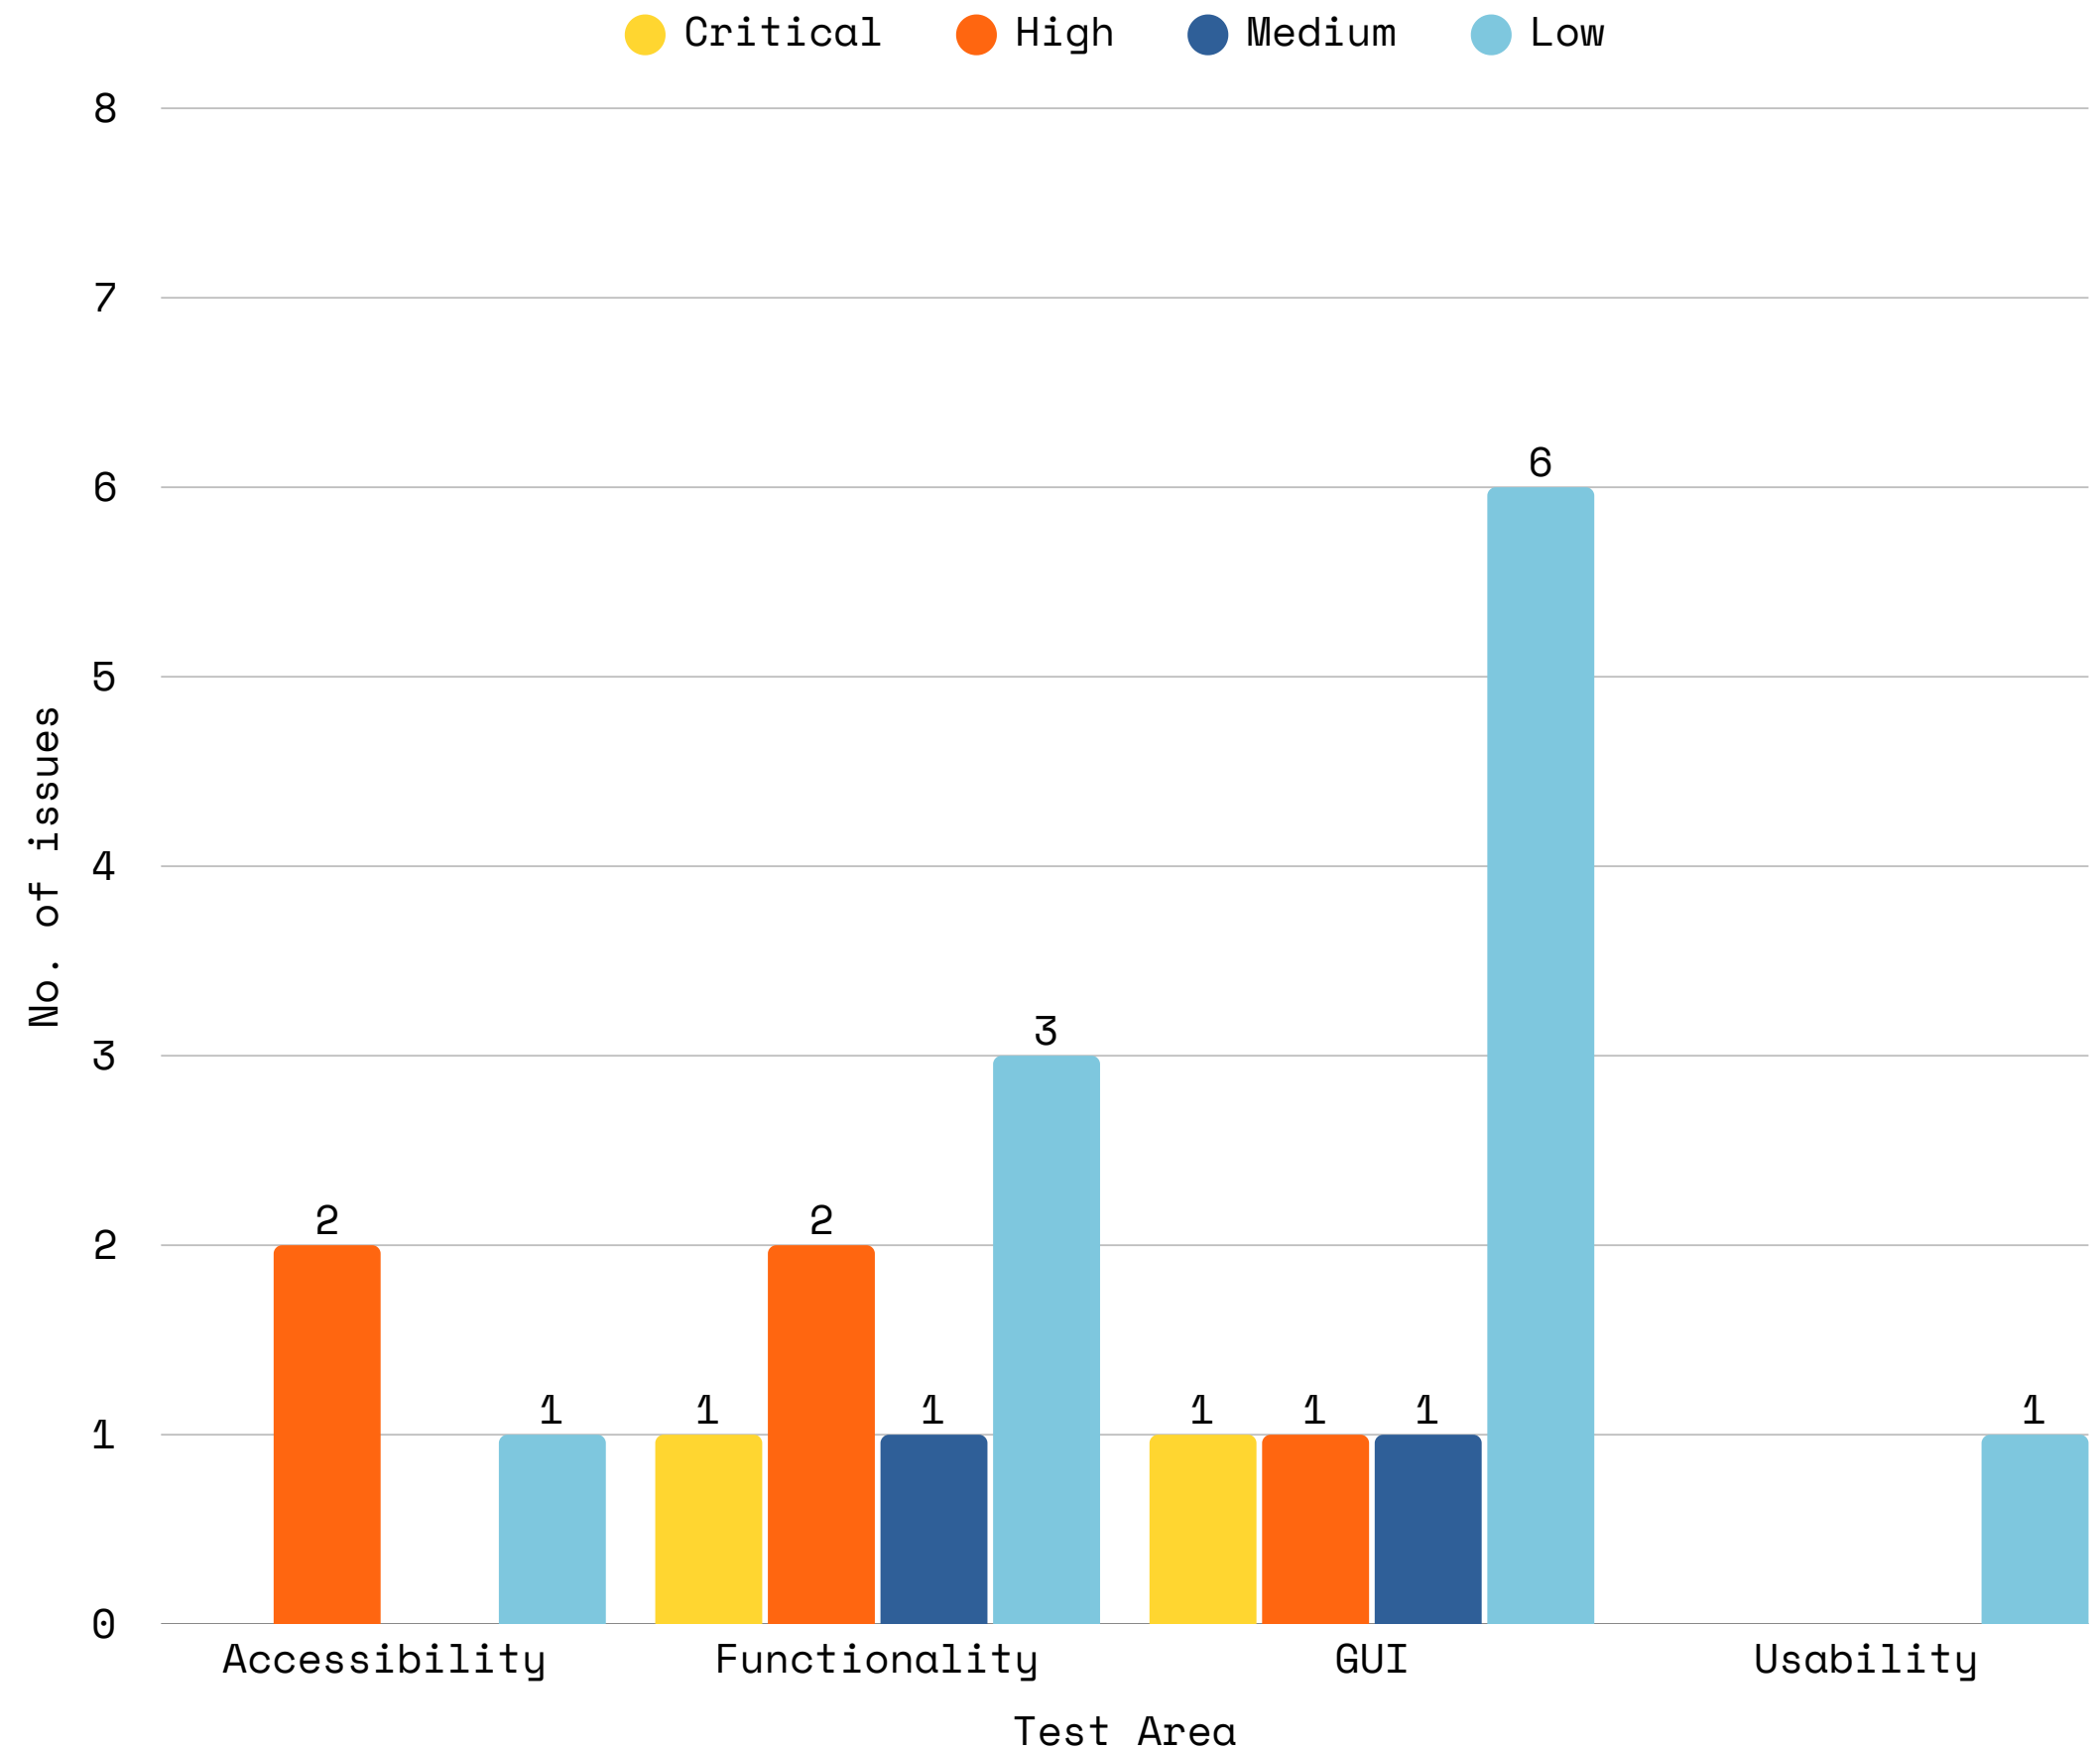

# Severity VS. Priority

the number of bugs  
found, categorized by  
severity and priority

# Test Area VS. Severity

the number of issues found in  
each test area and it's  
severity

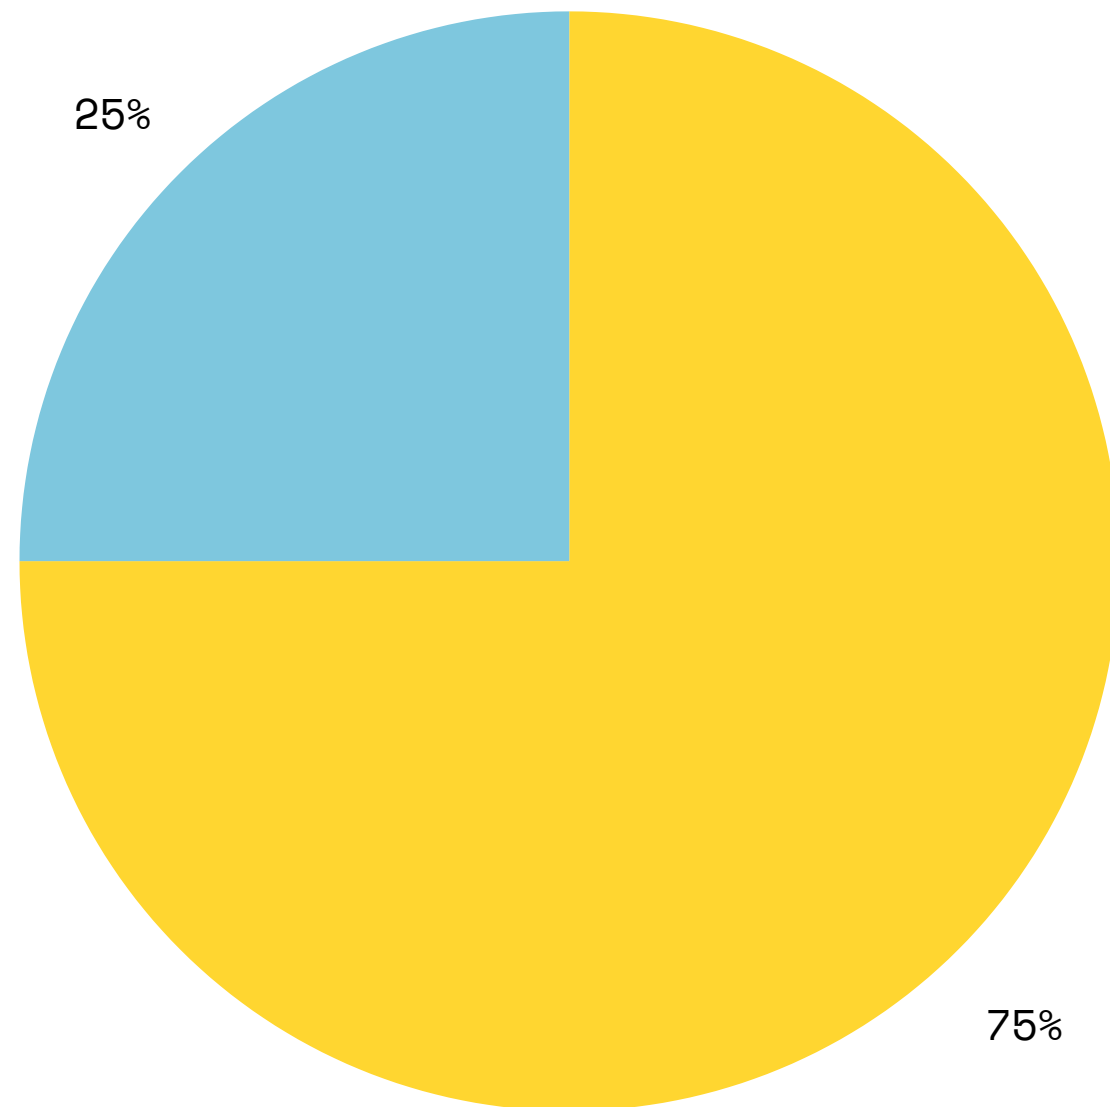

# USERS FEEDBACK

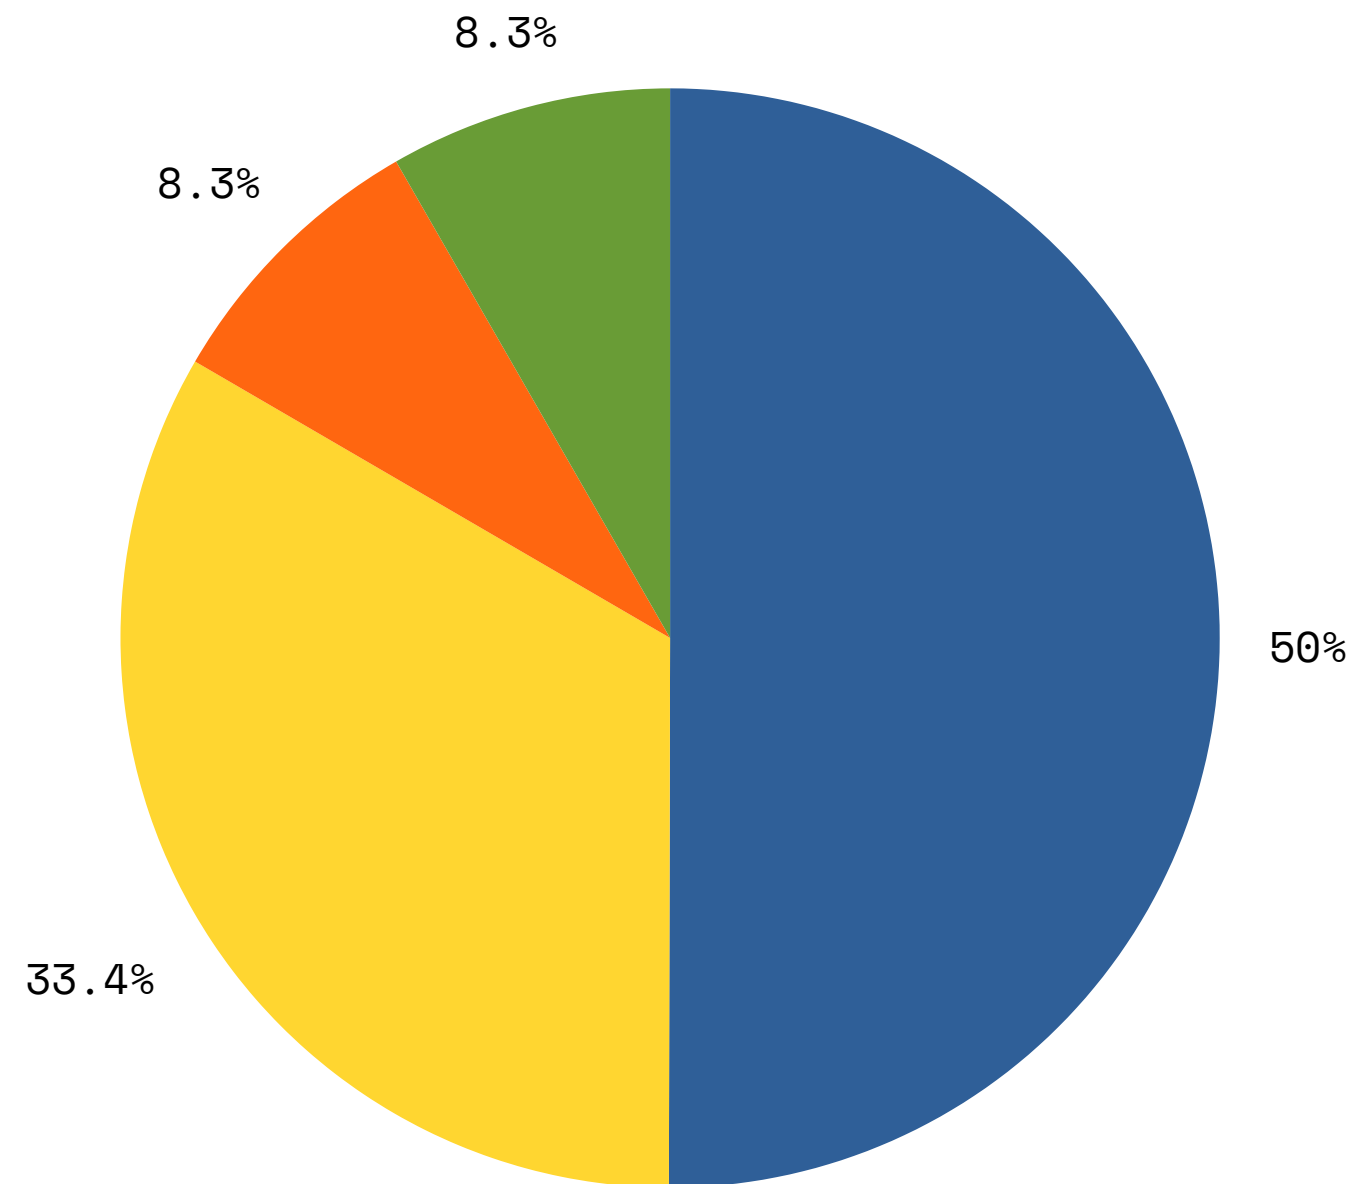

Tested on users. No users were  
harmed during the process.

# Users Distribution Based on Age Group

- 13-17
- 18-34
- 35-49
- 50-64
- 65+

# Would you visit this website again?

- YES
- NO
- MAYBE
- As a city resident, I would gladly enter - a very friendly website

# The people have spoken

## AKA

## What can we improve???

01

Innovative design, better division into subcategories.

---

02

It needs a modern design.  
Shorten the homepage.

---

03

They called from 2005 – they really want their website back.

---

04

The design needs to be changed; it feels outdated.

---

05

The website feels like a local paper from the 1980s. It should be refreshed, with more investment in design and less prominent ads.

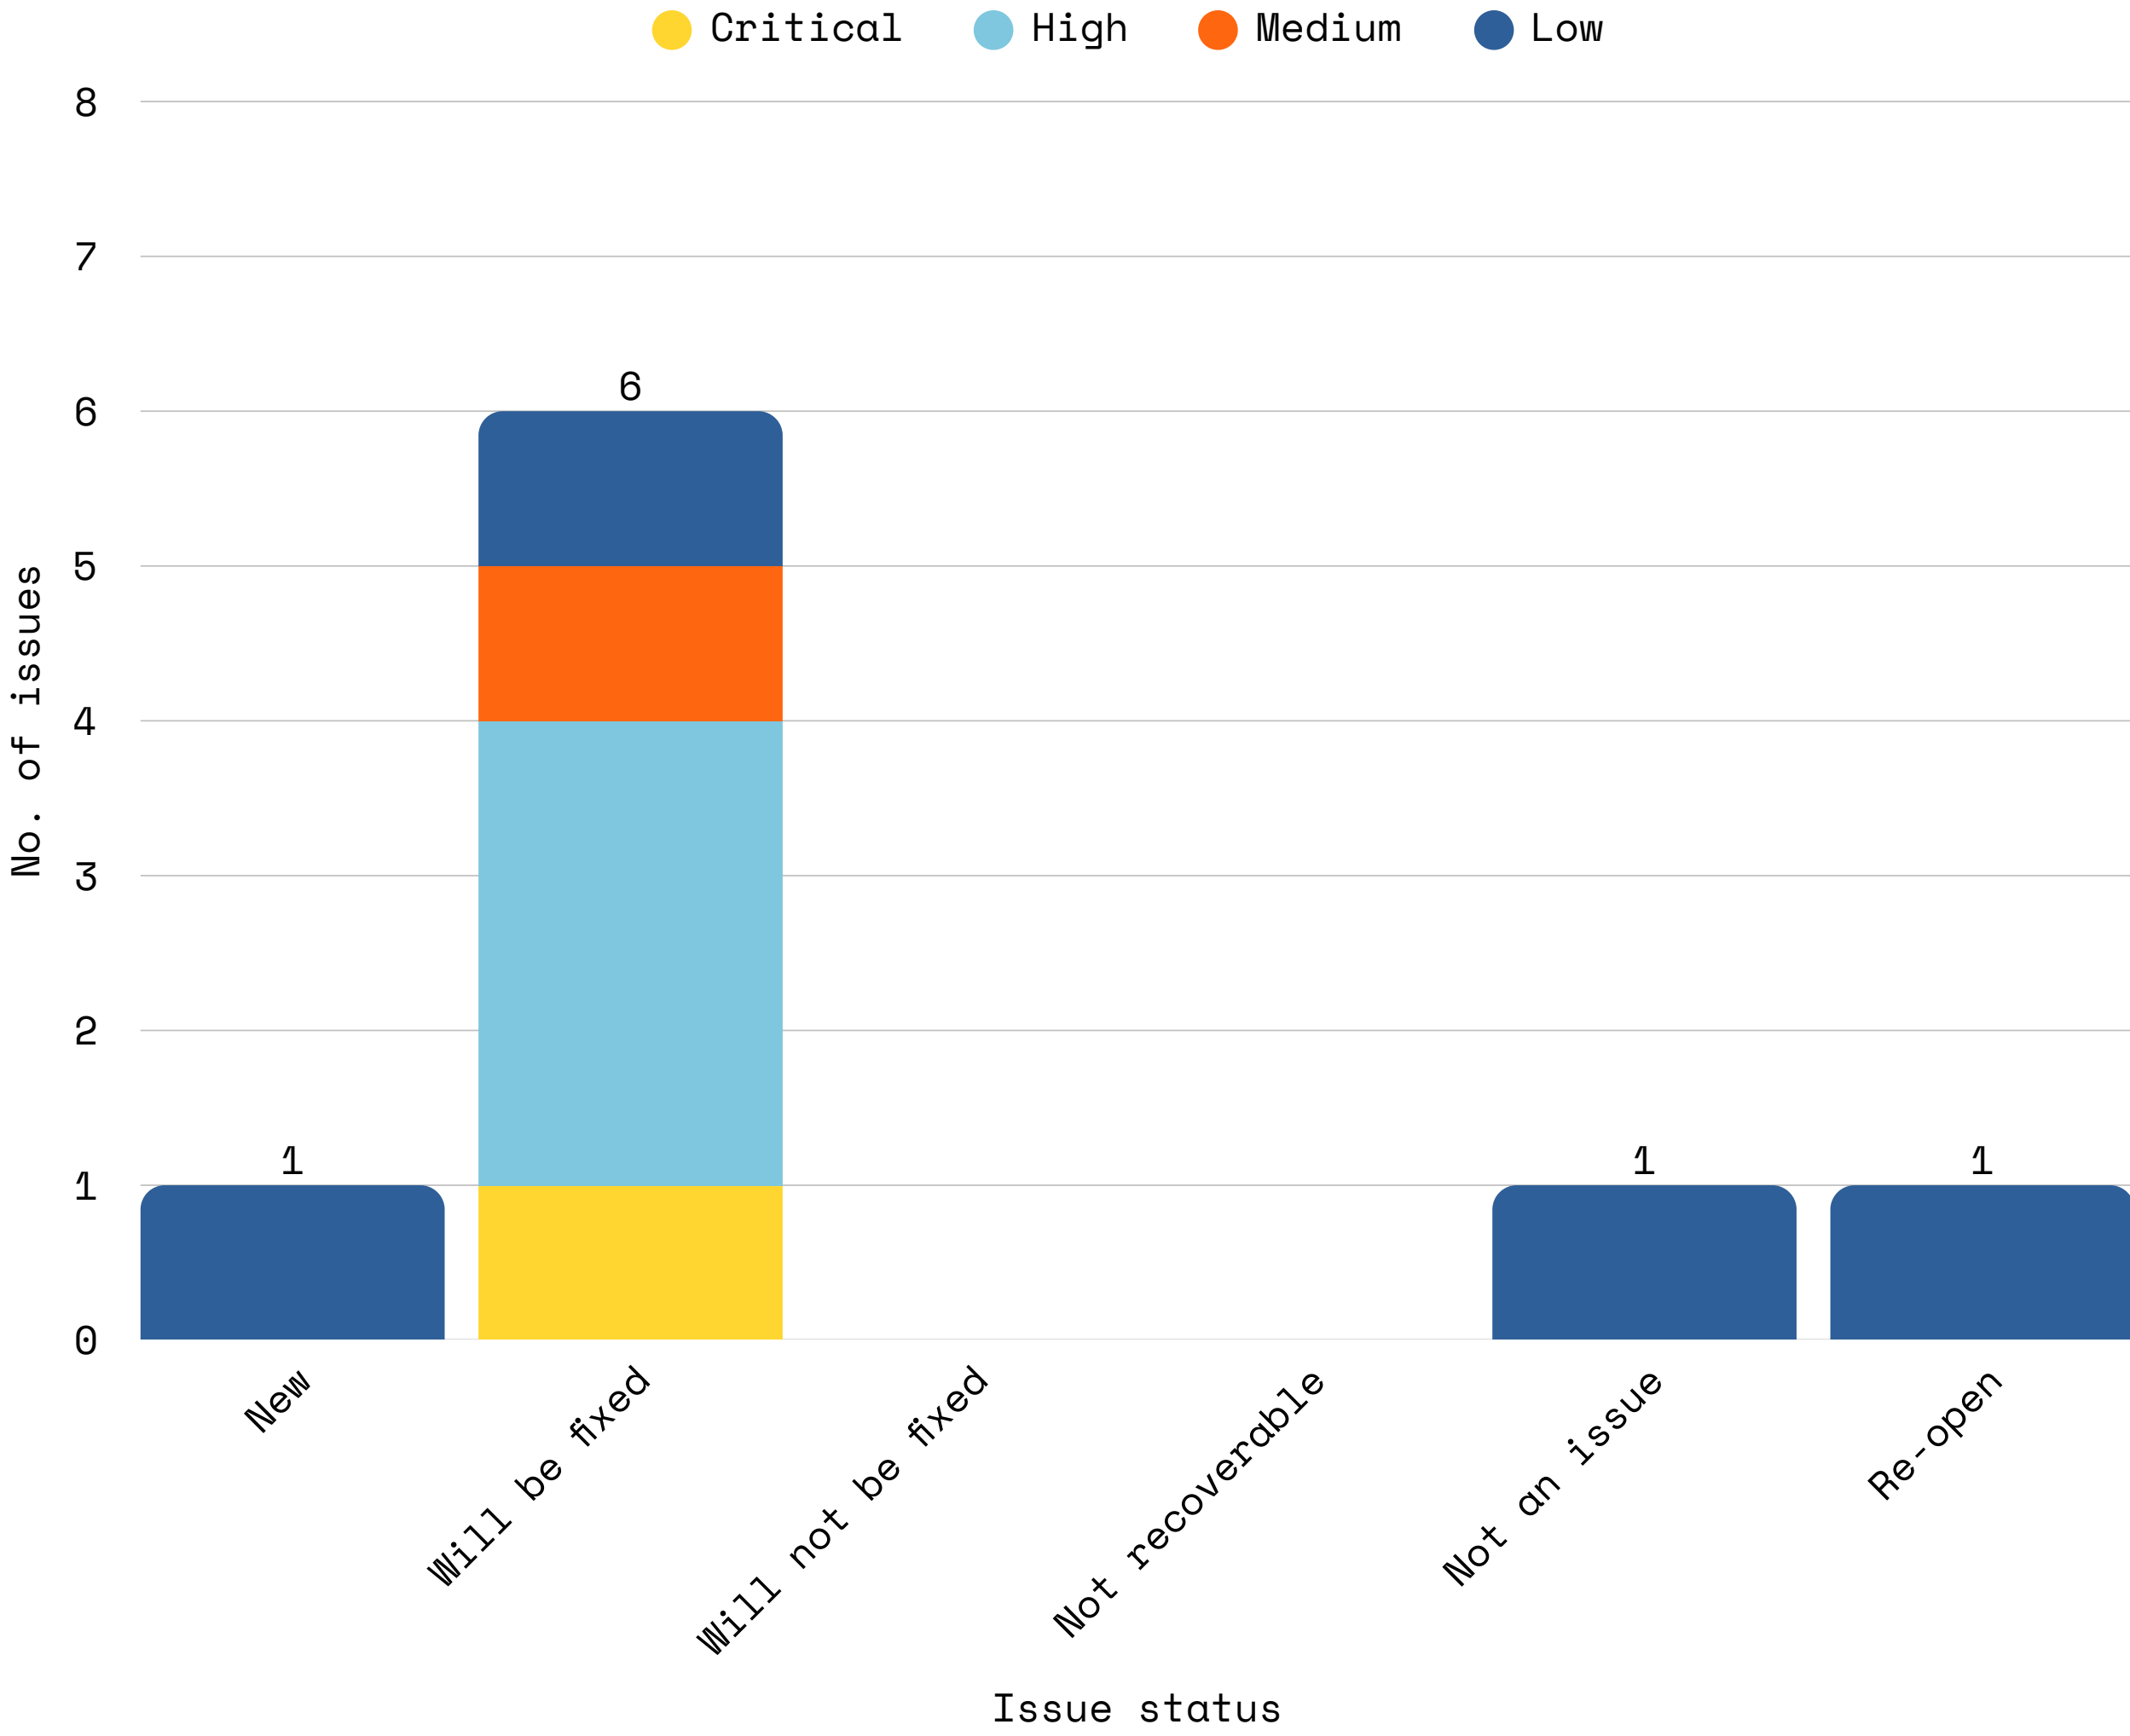

# QA TEAM RECOMANDATIONS

One last chart

# System quality assessment

Final status of the open issues - according to the severity of the issue

# Next Steps

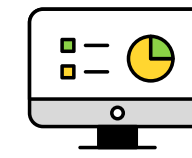

The site can be published

Although a critical issue was found and hasn't been resolved yet, it does not justify delaying the website's launch. However, it should be addressed promptly after publication.

Fix Links & Improve UI

Most remaining issues are not critical and relate to broken links and visual/interface elements. These should be corrected to improve the overall user experience.

Core functionality unaffected

The main issue appears in one of the site's service sections but does not disrupt the user's ability to access key information or navigate the site.
